

ABSTRACT

The object of this invention is to provide a sales support system of sales subjects by which the date of delivery (delivery date) of sales subjects including commodities,
5 products or service may be shortened.

In order to achieve the object, the sales support system of this invention has a terminal system 51 which is provided with input means to input information related to the sales subject received from the customer and a display means which may display information related to the sales subject to the customer and an information management
10 section 53 which is connected and may communicate with the terminal system and includes information related to the sales product and purchase order for the sales product and receives the purchase order of the sales subject from the terminal system and determines the facility which may provide the ordered sales subject.

(54) Title: SALES ASSISTING SYSTEM

(54) 発明の名称 販売支援システム

(57) Abstract

A sales assisting system for assisting sales of an object such as commodity, products, and services to be sold so as to shorten the delivery term. The sales assisting system includes a terminal system (51) which comprises input means for inputting information on object to be sold collected from customers and display means for displaying information on object to customers and in which the information on object collected from customers includes information on order of object and an information managing system (53) for assisting sales which is so connected to the terminal system as to communicate with the terminal system and in which an order of an object is received from the terminal system and a facility is determined where the customer receives the ordered object.
